## GENERAL OVERVIEW

The Point in Time Report shows a snapshot of the percentage of interviews that have a positive outcome for each of the National Outcome Measures (NOMs). This report is intended to provide Grantees and CMHS information on how all consumers are doing in terms of their NOMs for a specific time point. For example, a Grantee could see what percentage of all interviews reported positive functioning at baseline. Depending upon your level of access, the report can be run for one or more grants, one or more programs, or for all grants. Individual client level data are not reported.

This report is different from the Outcome Measures Report in that data are shown for all consumer interviews for the specific time point selected (baseline, 1<sup>st</sup> 6 month, most recent assessment, or discharge). The Outcomes Measures Report provides information about the change in consumer outcomes and includes data only for matched cases, meaning the consumers shown in that report must have valid data for both baseline and the second interview time point. Additionally, the Point in Time report shows proportion of interviews that endorsed the NOMs at the selected time point as well as the proportion of interviews that did not endorse the NOMs at that same time point. For example, you can see the number and percentage of consumers who were not experiencing serious psychological distress and/or those who were experiencing serious psychological distress. Finally, this report allows you to select which measures you would like to include in the report as described below in Step 2.

## SECTION A: KEY TERMS

**Consumer:** A consumer is a person who is actively receiving or has received services from a CMHS funded program.

**Federal Fiscal Year (FFY):** The federal fiscal year is the accounting period of the federal government. A Federal Fiscal Year begins on October 1 and ends on September 30 of the next calendar year. Each FFY is identified by the calendar year in which it ends and commonly is referred to as “FFY.” For example, FFY2011 began October 1, 2010, and ends September 30, 2011.

**Role:** Your role in the TRAC system governs what you can view in the system. Some roles include project director, grantee staff, and government project officer (GPO). The general rule of thumb is that you can run reports for the grant(s) and/or grant program(s) you are associated with. For example, most grant project directors or grantee staff are associated with just one grant and would only see data for the one grant they are associated with.

## SECTION B: RUNNING THE REPORT

There are three steps in running the **Point in Time Report** in the TRAC system. They are:

1. Navigate to the Point in Time Report
2. Select the criteria for the report you wish to view
3. View the report

### Step 1: Navigate to the Point in Time Report

Select **Reports** on the homepage from the left menu bar.

Select the link for **WesDax TRAC Reports System** in the middle of the screen. The WesDax TRAC Report System will open in a new browser tab.

The WesDax TRAC Reports system is shown below. Select the **Services Point in Time Report** link in the left menu. A submenu will appear. Choose whether you want to run the report by Program List or Grant List.

- The Program List will let you run the report by all Programs or specific Programs (based on your access).
- The Grant List allows you to run the report for all grants or specific grants (based on your access).

Project: TRAC >> WesDax TRAC Reports

Welcome to the WesDax TRAC Reports

To run a report, select it from the list on the left, then follow the instructions on the screen.

If you need assistance, contact [TRAC Help](#).

For more information contact:  
Toll-free: 1-888-219-0238  
[TRAC Help Desk](#)

**NOTE: To run a default report, click “View.”**

You can skip step 2, selecting the criteria for your report. You only need to select criteria if you want to customize your report by sorting or filtering it.

## Step 2: Select the Criteria (Optional)

You can set several criteria for the Point in Time Report. These criteria specify what data will be included in your report. To set criteria, use the pull-down menus to make your selections. The following report criteria are available and are described in more detail below.

- A. Output as
- B. Report By
- C. List Rows By
- D. Include Program Summary
- E. Grant Status
- F. Federal Fiscal Year
- G. Assessment
- H. Measures
- I. Population
- J. Region
- K. State
- L. Program/Grant

### A. Output as

You can have the report output in HTML, PDF, RTF or Excel. The default is PDF.

### B. Report By

You can produce a report by the following options: All Combined; By Program; or By Grant. The default is All Combined.

- All Combined – data for the selected program(s) or grant(s) are collapsed into one table.
- By Program – data for the selected program(s) or grant(s) are displayed in one table per program.
- By Grant – data for the selected program(s) or grants(s) are displayed in one table per grant.
- By State- data for the selected state are collapsed into one table.
- By Region- data for the selected region are collapsed into one table.

### C. List Rows By

This determines the rows of the output. The default selection is Outcome Measures, meaning each row of the report will be an outcome. If Program/Grant is selected the rows will be determined by the selection in Report By. For example, if By Grant was selected in the Report By filter the report output will have a table for each outcome with the rows being each grant selected.

### D. Include Program Summary

This is a yes/no drop down for you to indicate if you want a Program Summary included in the report. The default selection is **No**, meaning the program summary will not be shown in the report.

### E. Grant Status

You can run the report for active grants or all grants. “Active Grants” includes only grants that have not yet ended. “All Grants” includes grants that have ended in addition to active grants. The default is active grants.

## F. FFY- Federal Fiscal Year

You may select a FFY from the current FFY back to FFY 2007. The default selection is the current FFY. The FFY begins on October 1 of the previous year through September 30<sup>th</sup> of the specified year. The report will display five FFYs total, the FFY selected in the criteria screen and the four FFYs prior to it. Depending on the FFY selected and/or the number of years in a given grant:

- Not all grant years may be shown at one time in the report
- There may not be data for a particular FFY, in which case “0” will be displayed.
- 

## G. Assessment

You can select which assessment time point to include in the report. This determines which interviews are displayed. Baseline is the default.

**NOTE:** This report provides all consumer interview data for the assessment type selected for every episode of care available. The Number of interviews displayed should not be used as a count of consumers.

The options are:

- Baseline - displays data for all Baseline Interviews.
- 1<sup>st</sup> 6-Month Reassessment - displays data for every 1<sup>st</sup> 6-month reassessment.
- Most Recent Assessment (for each FFY) - displays data for the most recent assessment that was conducted in each FFY for the duration of the consumer’s treatment. The most recent assessment could be a baseline, reassessment, or discharge.
- Discharge – displays data for all Discharge Interviews.

See the example on pages 9 and 10 for more detail on how to interpret the data for each assessment option.

## H. Measures

The report displays data for the NOMs and allows the user to select any combination of measures. The default will display the NOMs.

## I. Population

You can filter the report by specific populations. The available population filters are: Gender, Sexual Identity, Hispanic/Latino, Race, Age group, Military Service, Trauma, and Housing.

The default is “No filter selected” which will produce a report with all consumers included.

To filter the report by a specific population, click on the check box for the population you want to see; the report will then only include consumers that match the checked criteria. You can filter by more than one population group at a time.

For example, you can run the report for males who are ages 16-25 by clicking the male and the 16 – 25 age check boxes. To protect the privacy of consumers, any cell that contains less than 5 consumers will be suppressed (indicated with an S) when population filters are used.

**J. Region**

You can select one or all of the regions. The default selection is All Regions.

**K. State**

You can select any combination of states. The default is all states.

**Note:** The State and Region selection criterion are mutually exclusive, meaning you can make a selection from one or the other however not both. For example, if “1” is selected for region then a specific state, like” MD”, can’t be selected. If “All Regions” is selected then a specific state or any combination of states can be selected.

**L. Program or Grant**

This section lists the grants or programs for which you can run the report.

**Step 3: View the Report**

Select **View** to view the report.

**Please note:** The report will open in a new window.

## **SECTION C: REPORT LAYOUT**

The report layout is shown on the next page.

## Point in Time Report

**Report By:** Program

**Include Program Summary:** No

**Grant Status:** Active grants only

**FFY:** 2013

**Assessment:** From Baseline to 1st 6-Month Reassessment Interview

**Measures:** Healthy overall; Functioning in everyday life; No serious psychological distress; Were never using illegal substances; Were not using tobacco products; Were not binge drinking; Retained in the Community; Had a stable place to live; Attending school regularly and/or currently employed/retired; Had no involvement with the criminal justice system; Socially connected

**Population(s):** Gender – Male; Sexual Identity – Heterosexual; Military Service Members, Veterans, or Families; Experienced trauma; Housing - Homeless only

**Region(s):** 1, 2, 3, 4, 5, 7, 8

**State(s):** AL, AR

**Selected Program(s):** Program ABC

**Grant(s):** SM12345

**Data entered as of:** January 13, 2013 1:31 PM EST

### NOTES:

1. Only selected programs/grants that have Point in Time data will be displayed.
2. The Number of Interviews is the number of records included in the analyses. This includes any interview in the FFY shown with a valid answer pertaining to each measure.
3. Percent Positive is the percent of interviews with a positive outcome at the selected assessment. This is interpreted as x% of the Number of Interviews shown.
4. The client perception of care measure applies to data collected at reassessment or discharge only.
5. S = Results are suppressed when there are fewer than 5 consumers for each measure.

**CONFIDENTIAL**

**Point in Time Report**  
**Program=Program ABC**

	FFY 2009		FFY 2010		FFY 2011		FFY 2012		FFY 2013		All Years (To Date)

**CONFIDENTIAL**

## SECTION D: USING THE REPORT

### What information does the Point in Time Report show?

Reading the report from left to right, the report shows for the assessment time point selected:

- The National Outcome Measures (NOM's) or other measure(s) that were selected
- FFY: The Federal Fiscal Year that was selected and the five previous FFYs.
  - Number of interviews - The total number of consumer interviews included in the report
  - Percent Positive - The percentage of consumer interviews with a positive outcome
- All Years (to date): All years that span the length of the grant or program to date (not just the years shown in the report)
  - Number of interviews - The total number of consumer interviews included in the report for all years of the grant
  - Percent Positive - The percentage of consumer interviews with a positive outcome for all years of the grant

### How are assessments shown in the Point in Time Report?

- Baseline: This will display data for all Baseline Interviews. If a consumer has multiple baseline interviews, data for each of the baselines will be included in the report output, even if the baselines occurred in the same FFY.
- 1<sup>st</sup> 6-Month Reassessment: This will display data for every 1<sup>st</sup> 6-Month Reassessment Interview. If a consumer has multiple episodes of care and more than one 1<sup>st</sup> 6-month reassessment interview, data for each of the 1<sup>st</sup> 6<sup>th</sup> month reassessments will be included in the report output.
- Most Recent Assessment (for each FFY): This will provide data for the most recent assessment interview that was conducted in each FFY. The most recent assessment could be a baseline, reassessment, or discharge for a given year. If a consumer's most recent assessment was a baseline for one FFY, a reassessment for the next FFY, and a discharge for another FFY, each of the assessments will be included in the report output for the corresponding FFY.
- Discharge: This will show data for all Discharge Interviews. If a consumer has multiple discharge interviews, data for each of the discharges will be included in the report output even if the discharges occurred in the same FFY.

### What do the numbers mean?

Below is an example of how to read the Point in Time Report using the sample shown on page 6.

### The Header

The report heading shows that all of the data in this report applies to consumer interviews in Program ABC, Grant SM12345, as of January 13, 2013 (the date the report was produced) for the **Baseline Assessment**.

### The Table

For the column showing **FFY 2010**, we will explain what the numbers mean for the first outcome shown, **“Healthy overall”**.

## What does the N under the FFY column mean?

For FFY 2010

- **5,019 baselines had** one of the following valid responses for question B1 (How would you rate your **Overall Health** right now?):

The sample report shows that **5,019 baseline interviews** had *valid* interview data (answered either ‘poor’, ‘fair’, ‘good’, ‘very good’, or ‘excellent’) for a baseline in FFY2010 for the **Healthy overall**<sup>1</sup> outcome.

Note:

- If a consumer had valid data for more than one baseline interview in FFY 2010, each of his/her baselines is counted toward this total.
- The numbers shown in the Number of interviews column for FFY 2010 vary for each measure because some consumer interviews did not have had valid responses at baseline.
  - One reason for this is consumers may have refused to answer or responded with an invalid answer for one or more questions. For example, for **FFY 2010** fewer interviews had answers for the questions for the **Healthy Overall** measure (N=5,019) in comparison to the question for the **Housing** (Had a stable place to live) measure (N=12,999).
  - A second reason is the NOMs data collection began in 2006 and measures have since been added to the tool. So the newer measures have smaller Number of interviews in the years when they are first implemented in comparison to the existing measures. For example, the **Healthy overall** outcome shows “0” in FFY 2009 because this measure was implemented in 2010.
- The numbers shown in the Number of interviews column may also be different for a measure across years due to differences in the number of consumers served and/or completing interviews with valid data. For example, **5,019** consumer baseline interviews had valid **Healthy overall** data for **FFY 2010** compared to **20,421** in **FFY 2011**.

<sup>1</sup> B1: How would you rate your **overall health** right now?

## What does Percent Positive under the FFY column mean?

For FFY 2010

- **52.6% of the 5,019 baselines reported positively** for question B1 (How would you rate your **Overall Health** right now?) or with “good”, “very good” or “excellent” as the response:

Good

Very  
Good

Excellent

The sample report shows that **52.6%** (of the 5,019 baselines) **had positive Health overall in FFY 2010.**

The criteria for determining whether a measure is positive are defined in the Appendix below. For the NOMs, these definitions are the same as how they are determined for the Services Outcome Measures Report.

## What does the N under the All Years (to date) column mean?

For All Years to date

- **55,490 baseline interviews in total had** one of the following valid responses for question B1 (How would you rate your **Overall Health** right now?) **across all grant years to date:**

Poor

Fair

Good

Very  
Good

Excellent

The sample report shows that a total of **55,490** baselines had valid **Healthy overall** data **across all years of the grant.**

- Note: If a consumer had more than one baseline interview in TRAC, each of those interviews is counted toward the total shown in this column of the report.

What does Percent Positive under the All Years (to date) column mean?

For All Years to date

- **55.4% of the 55,490 baselines** reported positively to question B1 (How would you rate your **Overall Health** right now?) **across all grant years to date** or with “good”, “very good” or “excellent” as the response:

**Good**

**Very**

**Good**

**Excellent**

The sample report shows that **55.4%** (of the 55,490 baselines) **had positive Health overall across all the years of the grant** (FFY 2008 to FFY 2013).

## THINGS TO REMEMBER / FREQUENTLY ASKED QUESTIONS

- This report is different from the Outcome Measures Report in the following ways:
  - It displays percent positive for a particular interview, instead of comparing two interviews.
  - It displays only the number and percent of interviews with a positive response for the measure at the selected time point.
  - It displays up to 5 years' worth of data.
- The Number of interviews or Percent Positive from the FFY columns can't be added up to match the numbers in the **All Years (to date)** columns. This is because the **All Years** columns include data across all years of the grant through the current year and not just the years shown in the report output. For example if a grant started in FFY 2007 and is still active the **All Years** column would contain data from 2007-2013 although the report may only show FFY columns of 2009 to 2013.
- The report will contain interview data for each FFY if the consumer has more than one interview for the selected assessment. For example, if a consumer has a reassessment interview in Federal Fiscal Years 2009, 2010, and 2012 they will be included in all three years if the report is run by most recent assessment. For baselines and discharges, the report will show interviews from all episodes of care in the appropriate FFY.
- If you do not change any criteria and simply view the report it will run with the following default filters: All Years Combined, Baseline Assessment, Active Grants only, NOMs, and All Regions/States.
- National Outcome Measures are as follows:
  - Functioning\*
  - Retention
  - Stability in Housing
  - Education and Employment
  - Crime and Criminal Justice
  - Perception of Care
  - Social Connectedness

**Note:** \*This report separates the functioning category into 6 subcategories (healthy overall, functioning in everyday life, no serious psychological distress, were never using illegal substances, were not using tobacco products and were not binge drinking).

- If your user account was just created, you may not have access to this report for up to 36 hours.

## **ACCESSING HELP**

For technical support or questions about TRAC, please contact the TRAC Help Desk, located at Westat.

**Telephone:** 1-888-219-0238

**Email:** [TRACHELP@westat.com](mailto:TRACHELP@westat.com)

**Hours:** M-F 8:30 AM – 7:00 PM (EST/EDT)

## APPENDIX: TECHNICAL DETAILS

This section describes the items that appear on the report in more detail.

**Number of Interviews** is the count of interviews that have a valid response at the selected assessment for the questions used to determine the measure. The interview is not included in the analyses (not valid) and thus not shown in the count if his/her response is *"Not applicable"*, *"Not asked on previous Services tool"*, *"Not applicable, caregiver"*, *"Don't know"*, *"Refused"* or *"Missing"*. The number of interviews reported for each of the measures may differ depending on missing/non-response data and the criteria selected on the criteria selection screen.

**Percent Positive** is the percentage of interviews with a positive outcome at the selected interview time point.

The table below shows how specific questions on the Services tool were combined into the summary outcome measures shown on the Point in Time Report.

<b>NOMs</b>	<b><u>Tool Question Numbers and Questions</u></b>	<b><u>Valid Case Values</u></b>	<b><u>Criterion for Valid Cases (N column)</u></b>	<b><u>Criteria for Inclusion (% positive column)</u></b>
